

## Expertise At Every Stage

Blue Star Power Systems, Inc., a power generation systems integration specialist, manufactures complete diesel and gaseous driven generator sets ranging from 25 to 2000 kWe. Founded in 2004 as a refurbishing company of existing power systems, today Blue Star Power Systems, Inc. has grown to offer our own full and complete product line. This allows us to serve all major agriculture and industrial markets within the decentralized power generation industry. Our products are sold through a network of distributors strategically located in the U.S. and Canadian markets. Our power systems are highly engineered, comprehensive systems which, through technologically sophisticated development and manufacturing processes, including the design, sourcing, prototyping, testing, and engineering capabilities allow us to provide a standard or customized product to meet our distributors' and customers' unique specification requirement or application.

Offering a comprehensive portfolio of products to serve all major markets within the power generation industry allows for us to be a single source supplier. Our portfolio of products and expertise are expansive and continually growing. We strive for continuous improvement of our products; this is the basis for a culture in which quality and performance are consistently demanded and enhanced. Our products and turn-key solutions are complete, from full engineering design and support through completion of project. Our products can be found all over the U.S. and Canadian markets, utilized in applications such as: manufacturing, telecommunications, data centers, oil and gas, hospitals, mobile healthcare centers, railroad maintenance equipment, aggregate mines, peak shaving, curtailment programs, retail, transportation, government, waste water treatment facilities, military, aerospace, and even NASA.

## A Decade of Growth
