

# JL Series Industrial Grade Silencers

**BLUE STAR**  
Power Systems Inc.

## Blue Star Power Systems, Inc. JL Series Standard Application

- ▶ Heavy-duty industrial grade silencer
- ▶ Designed for heavy-duty stationary and mobile power units
- ▶ Silencing is sufficient for commercial or industrial areas where ambient noise is relatively high

## Standard Construction Features

- ▶ Aluminized Steel standard for silencers up to 26 inch body diameter
- ▶ Silencers larger than 26 inch body diameter standard carbon steel
- ▶ Can be mounted vertically or horizontally
- ▶ Standard high temperature (1200°F) satin black finish
- ▶ Fully welded steel construction
- ▶ 1/2" NPT Drains standard
- ▶ Standard NPT inlet and outlet connections on sizes 2 inch to 3.5 inch
- ▶ Standard 125/150# ASA drilled plate flanges on inlet and outlet of silencers 4 inch and larger
- ▶ Two-chamber design

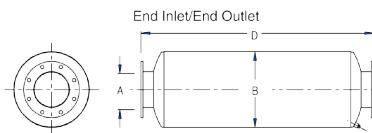

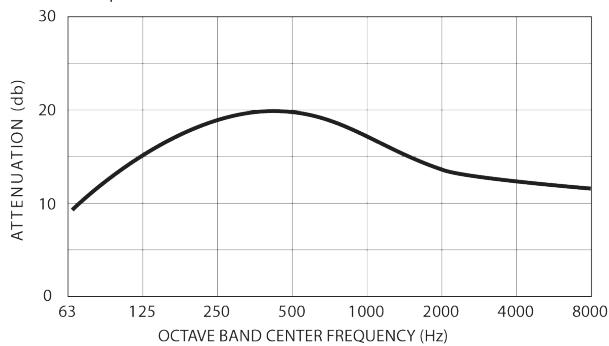

## Optional Construction Features and Accessories

- |   |   |
|---|---|
| ▶ Stainless Steel and Aluminum construction | ▶ Horizontal and vertical shell legs          |
| ▶ Special inlet and outlet connections      | ▶ Special acoustical designs                  |
| ▶ Special inlet and outlet locations        | ▶ Internal and external shell lagging         |
| ▶ Special finishes available                | ▶ Inspection openings                         |
| ▶ Vertical mounting legs                    | ▶ Air leak tests                              |
| ▶ Horizontal mounting saddles               | ▶ ASME code construction                      |
| ▶ Mounting bands                            | ▶ Complete line of engine exhaust accessories |

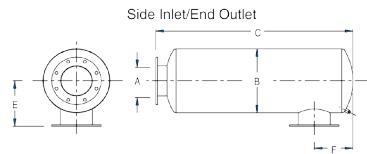

## Engine Exhaust Silencer and Optional Accessories

- |  |                               |
|--|-------------------------------|
| ▶ Exhaust Silencer                     | ▶ Mitered Tail Pipe Extension |
| ▶ Flexible Connector (Stainless Steel) | ▶ Exhaust Elbows              |
| ▶ Silencer Mounting Band               | ▶ Mating Flanges / Gaskets    |
| ▶ Rain Cap                             | ▶ Wall Thimble                |

Representative Attenuation Curve for "JL" Series Silencer

2 inch to 3 1/2 inch standard with male NPT connections; 4 inch and larger standard with 125/150# ANSI drilled plate flange connections.
